

Game Recording Equipment and Software Policy

The Guelph Soccer Club currently provides shared access to Club purchased video equipment and licensed software that is to be used during Guelph Soccer practices and/or games.

Purpose

To provide Guelph Soccer Competitive teams a means to invest in their own video equipment and licensed software and to protect that investment so that any equipment that is purchased by a team will remain with that team for subsequent years.

Policy

Guelph Soccer is committed to improving the technological supports our members and teams receive among our programming. While Guelph Soccer will continue to provide shared access to Club purchased video equipment and licensed software, Guelph Soccer will support individual teams purchasing their own video camera(s) and licensed software subscription plan if it is in line with the equipment and software currently used by the Club.

Purchasing

Any team that is interested in purchasing their own video camera and licensed software is required to submit a formal request in writing to the Guelph Soccer Technical Director.

Guelph Soccer will coordinate the purchase of the necessary camera and subscription software on behalf of the team on the Club account.

The team will be invoiced for their purchase and will be required to pay Guelph Soccer Club prior to the camera and software being released to the team.

The purchased software and camera will be designated to the team that made the purchase and will not be allotted to any other group for use.

Guelph Soccer will provide the team with full use of the platform, and sole access to the camera and accompanying equipment.

The camera, accompanying equipment, and software, will be owned by the team and not the individual. It is under this parameter that Guelph Soccer will be the purchaser of the camera and software to ensure that the equipment and software remain with the team for subsequent years.
